

Discover new horizons of smart educational solutions with KALBOARD Complete App. The creative application that runs on mobile devices, which offers a great mixture of effective teaching, interactivity and collaboration in classrooms.

KALBOARD Complete App consists of:

KALBOARD Complete Server

The main purpose of this part of the solution is to activate the classroom devices, manage classes and keep log of activities in the classroom, it is where the school management can generate and review reports of any activity in the classroom.

KALBOARD Complete Teacher

This part allows the teacher to utilize the solution to manage the classroom through grouping, attendance logs and conversation features.

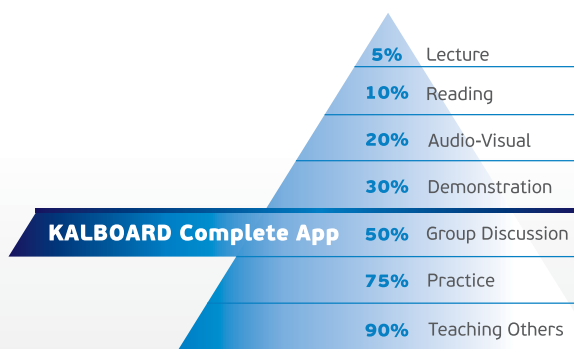

KALBOARD Complete Student

This part allow students to communicate with the teacher, vote, share in discussions from class or home.

The Learning Pyramid Average Retention Rates

According to recent studies, using currently available teaching techniques (including Interactive boards and datashows) contributes to a maximum of **30%** of student's understanding of a certain topic.

On the contrary, using **KALBOARD Complete App** and its applications that run on mobile devices (like the iPad), increases this rate to **50%**, which is a relatively high percentage.

KALBOARD Complete App Key Features
